

# ParentCheck® Product Information:

**ParentCheck®** is Sciteck's urine or saliva collection and testing kit designed for Parents, Teachers and others who want the ability to screen their kids in the privacy of their homes. The kits offers everything one would need to perform a drug screen. In addition, this unique kit offers drug testing performed at it's certified laboratory or confirmation of screening drug test positive that was performed at home.

Sciteck Clinical is one of the highest accredited Laboratories in the U.S:

CAP FDT Saliva Accredited:7211231  
 CAP FDT Urine Accredited:7211231  
 CAP Clinical Laboratory Accredited:7173101  
 HHS CLIA Certified:34D0987682

### Options:

- 1: Urine or Saliva (Oral Fluid)
2. On-Site testing device(s) and collection device
3. Or, just the collection device for shipping out and testing at our Certified Lab. (Best Deal, you can't beat lab based testing)

### How it Works:

**For On Site Testing:** You collect the sample urine or saliva then follow the testing devices instruction. Within minutes you will have your results.

### For Lab Based Testing:

Once the specimen is collected it is placed in the enclosed mailer. The results will be reported within 24 hours of our receipt all you have to do is call for your results using your password. The results will be mailed at your request. Parents now have a safe and accurate way to determine drug usage in a confidential setting.

As a parent we like to offer you a proactive way of approaching this issue with your kids. It's private and non-invasive (saliva) way of minimizing the stress this puts on everyone. Whether we test the sample at our facility or you use a test kit they have both been validated by our laboratory.

### Benefits of Lab Based Testing:

Multiple published studies have shown that on-site test devices can be unreliable. Hence, the requirement by regulatory agencies for certified laboratory screening and confirmation.

Item Name	Item #	Description
ParentCheck® 5	PC5-UA	On-site urine 5 test drug screening device, adulteration strip, collection device and mailer
ParentCheck® 5	PC5-SA	On-site Saliva 5 test drug screening device, collector and mailer

ParentCheck® Lab Based Testing & Conf	PC10-LABUA	On-site Urine Collection Device and mailer

The **ParentCheck®** urine and saliva-based testing, collection & lab based services kits offer:

- Every Kit comes with collector for urine or saliva, adulteration test strip for urine, instructions and mailer.
- Saliva and Urine panel for 10 drugs classes: amphetamine (methamphetamine, amphetamine) cocaine, marijuana (THC), opiates (codeine, morphine, heroin metab., oxycodone), PCP, benzodiazepines (Valium, etc.), barbiturates, propoxyphene and methaqualone. (other tests available).
- Sciteck's patented Saliva Split Collector is the only one of its kind used by an accredited laboratory offering improved sensitivity, confirmation and chain of custody.
- Adulteration screening with the every urine specimen submitted. Saliva / Oral fluid is observed so no adulteration testing necessary
- Laboratory confirmations on urine and saliva using GC/MS are performed at Sciteck's CAP Accredited Laboratory.
- Reporting: Phone, Fax and / or mail

Confirmation testing is performed utilizing GC/MS (gas chromatography mass spectrophotometry), the gold standard of the industry, with results generally available within 24 to 48 hours of receipt in the laboratory.
